

THE TIER1 PRIVATE ORACLE CLOUD – CUT COST, CUT COMPLEXITY

Hosting Oracle applications and databases in-house can be costly, complex, and just plain frustrating. Expensive licensing fees, infrastructure, IT staffing retention and costs, and high power bills add up fast. Tier1 can help you harness Oracle’s power in the Cloud and ease your IT frustrations with a Private Cloud offering designed just for Oracle.

WE KNOW ORACLE

Our mission is to be your Oracle partner, inside and out. To that end, we now offer the Tier1 Private Oracle Cloud. Leveraging Oracle’s Private Cloud Appliance (PCA) technology and featuring Oracle’s most attractive licensing policies of Trusted Partitions*, it’s the most optimized, protected, and cost efficient computing platform for Oracle applications and databases.

- E-Business Suite
- PeopleSoft
- EPM
- Oracle Database
- OBIEE
- Backup and Recovery Services
- Any third-party and homegrown applications

WE PROVIDE EXCEPTIONAL SERVICE, PERIOD.

Long-term relationships are our primary focus and what we live for. With the Tier1 Private Oracle Cloud, you can tap into our world-class Managed Services organization, which we have SSAE-18 qualified twice annually to ensure absolute protection of your data and applications. You’ll work with a single point of contact that oversees our expert team of veteran analysts, developers, and DBAs. Our response times are swift and attuned to varying severity levels. Bottom line - you’ll receive 24/7 stewardship of your entire Oracle environment so you can spend those 24/7s doing what’s most important to you.
